Call for Late Breaking Results Posters

You are cordially invited to contribute Late Breaking Results poster to IROS 2019. Similar to the Late Breaking Results posters at previous IROS's, the submissions are one-page in length with a streamlined acceptance-decision process, and they are presented at the conference as posters.

This component of the conference technical program is intended to reach out the broader robotics research community, and the submissions are not peer-reviewed. Although accepted abstracts will be included in the conference proceedings, since they are not considered as publications, they will not be submitted to IEEE for inclusion in the Xplore database.

Under the theme of **Robots Connecting People**, IROS 2019 particularly welcomes submissions that address technological challenges in developing friendly robots that can work effectively with, for, and around people. As always, we also invite submissions in all areas of intelligent robots and systems, their components, and applications. For submission and formatting instructions, please visit: <http://www.iros2019.org/call-for-late-breaking-results-poster>.

To submit, please visit the IROS 2019 page in the PaperPlaza system at <http://ras.papercept.net/conferences/scripts/start.pl>
